

James J Marketing are hiring a Remote Working **Senior Full stack Developer** to join our clients studio.

You will be working with visionary clients to invent new ways of engaging people with digital products. Every day working collaboratively with high profile entrepreneurs, big name brands and the world's most respected institutions.

My clients are centred around talented, ambitious and passionate people. They're inspired by one another and our values build trusted relationships. They only hire the cream of the crop so the people you'll work alongside will be the best at what they do, just like you.

Developer Strengths

- Ability to quickly pick up new tech
- Curious and loves a challenge
- Team player
- Confident communicator – written and verbal

Developer Skills

- **PHP**
- **MySQL**
- **Laravel**
- **React**
- Git version control
- Experience using WordPress or similar content management systems, and familiarity with Amazon Web Services is an advantage

Why work with us?

We're successful, we're friendly, we're diverse and we love what we do.

Benefits

- Work from anywhere in the UK – full remote working
- There's flexible hours for all from day one
- Perkbox is a flexible benefits package, which includes free mobile phone insurance, money off tech, discounts on your weekly food shop, cheap cinema tickets etc
- fish in a bottle contributes 3% of your salary to your pension each month
- A cake on your birthday
- Plenty of social events
- The opportunity to learn from some of the most passionate and driven people in the industry

- Did we mention you get a cake on your birthday?

If this Full Stack Developer Opportunity is of interest to you then please send your CV to **James J Marketing** ASAP.

Thanks,
James J Marketing
